

# Versa-Tech Product Evolution

2007

VTI

- Standard features and functionality
- Programmable
- Wireless communications through external radio
- Real time current monitoring
- Hourly, average and peak load monitoring
- Scratchpad memory

2014

VTII

- Same basic functionality as the Versa-Tech I
- Advanced protection features
- Advanced Measurement/Monitoring/Logs
- Oscillography with user defined pre-trip cycles
- Programmable event and device logs
- GPS Status and time stamping
- Battery status monitoring
- Advanced Cyber Security Features

2015

VTLT

- Same features and functionality as the Versa-Tech I
- Reduced max. minimum trip range
- Lower interrupting rating
- Lower continuous current rating
- Cost effective down the line device

2017

VTXC

- Developed on the Versa-Tech II platform with added features and enhanced operational functionality
- Advanced power harvesting
- On-board SCADA capability
- Lower line current communication threshold
